MICHIGAN WINTER MAINTENANCE MANUAL

Promoting Safe Roads and Clean Water
Acknowledgments

This manual is dedicated to the protection of Michigan’s natural resources and the winter maintenance professionals who have the opportunity to protect them. *Michigan Winter Maintenance Manual – Promoting Safe Roads and Clean Water* is based on the *Minnesota Snow and Ice Control Field Handbook for Snowplow Operators, Second Revision* published by the Minnesota Local Road Research Board in 2012.

Thank you to the following sponsors and participants for their valuable input in the production of this document. Final interpretation is the responsibility of the authors.

**Project Funding**  
Great Lakes Regional Water Program  This material is based upon work supported by the USDA-NIFA under award No. 2012-48691-20334

**Project Management**  
Lois Wolfson - Specialist, Michigan State University Inst of Water Research  
Faye Sleeper - Co-Director, University of Minnesota Water Resources Center  
Rebecca Power - Co-Director, Great Lakes Regional Water Program  
University of Wisconsin-Extension

**Project Leader**  
Connie Fortin - President, Fortin Consulting, Inc.

**Manual Authors and Manual Development**  
Connie Fortin, Fortin Consulting, Inc.  
Nancy Mulhern, Fortin Consulting, Inc.

**Extension Liaison**  
Carlos Garcia-Salazar - Educator, Michigan State University Extension

**Publication Date**  
2013
Technical Expert Committee:
Mark Cornwell, Team Leader, Sustainable Salting Solutions LLC
Dave Barr, ADC Solutions
Mark Crouch, Michigan Department of Transportation
Tim Croze, Michigan Department of Transportation
Rob Doletzky, Universities-Facilities, University of Michigan
Dave Drullinger, Michigan Department of Environmental Quality
Ron Fadoir, Oakland County Water Resources Commission
James Fountain, Knapheide Truck Equipment Company
Amy Frankmann, Michigan Nursery Landscape Association
Chuck Fritz, City of Novi MI
Matt Kapp, Michigan Farm Bureau
Wayne Kukuk, Michigan Department of Environmental Quality
Ron Lacasse, City of East Lansing MI
Mike McCann, Snow Plow Group Inc.
Robert Pigg, Michigan Department of Agriculture and Rural Development
Matt Pratt, Michigan Department of Transportation
Mary Schulz, Michigan Local Government Benchmark Consortium
Dan Sommerville, Michigan Environmental Council
Ken Stanton, Universities-Facilities, Grand Valley State University
Roger Thelen, Universities-Facilities, Michigan State University
Brian Wendling, Drain Commissioner, Saginaw County
Matt Wiktorowski, City of Novi MI
Herm Witte, Witte Lawn Maintenance

Other Contributors:
Andrew Bahrou, Department of Environmental Quality
Andy Conroy, Department of Environmental Quality
Mark DeVries, McHenry County Illinois
Matt Goddard, Department of Environmental Quality
Darryl Heide, Road Commission for Oakland County
Brad Knight, Road Commission for Oakland County
Amy Kohlhepp, Michigan Department of Environmental Quality
Dawn Roush, Michigan Department of Environmental Quality
Laura Young, Michigan State University

Purpose of this Manual

The purpose of this manual is to help winter maintenance professionals achieve their goals of providing safe roads through sustainable winter maintenance practices and policies. As a maintenance professional involved in your organization’s winter maintenance program, your daily actions are critical components of its success.

Not only are you tasked with providing continued public safety on roads, parking lots and sidewalks during winter storm events, but the choices you make can greatly affect the ability of your organization to provide these services in a cost-effective manner. The actions you take can also make the difference between adding to or reducing the amount of salt, sand and other pollutants presently entering drains, creeks, streams and lakes throughout Michigan.

The over-application of deicing materials can have a detrimental effect on surface water, groundwater and drinking water quality. Studies have also shown that the over-application of deicing materials can contribute to habitat degradation in our local creeks, streams, and lakes and in vegetated areas near roadways. This has a negative effect on fish and other wildlife living in these areas. The use of deicing materials is being increasingly regulated, and discharge limits are being applied under federal and state storm water regulations.

This manual is designed to provide you with Best Management Practices (BMPs) and other information that can assist you and your organization in making sound decisions around your winter maintenance duties. The goal of this manual is help you establish procedures that will maintain the desired level of service while reducing the amount of deicing materials that are being applied. It will also help your organization comply with strict federal and state storm water regulations.

We hope that reading this manual will increase your knowledge of the equipment, materials and application processes that are used in winter maintenance operations. Reviewing this manual in your organization can provide an opportunity for further discussion between you, your coworkers, supervisors and managers on how to improve efficiency, while reducing the use of de-icing materials and increasing protection of the environment.

Throughout the manual you will find environmental tips shown with a fish symbol. These tips will help you reduce environmental impacts.

$ Throughout the manual you will find cost-saving tips shown with a dollar symbol. These tips will allow you to maximize your efficiency and save money.
